第一步：先将打孔辅助治具贴在左侧边背门锁扣安装处（如图），用工具钻圆孔，再钻长圆孔，进行锁付处钻孔。  
 Step 1: First, attach the drilling auxiliary fixture to the installation position of the left side back door lock buckle (as shown in the figure), drill a circular hole with a tool, and then drill a long circular hole to drill the locking position

第二步：钻完孔后进行背门锁扣锁付安装。  
 After drilling the hole, proceed with the installation of the back door lock buckle.

左右两侧安装方法一致。  
 The installation methods on both sides are consistent.

如图以左边为例

2-4 第一步: 把装车支架锁付治具(左边LH)安装在软顶总成支架上, A1处的孔对A2处的销, B1处的孔对B2处的销。  
Step 1: Install the locking fixture (left LH) of the loading bracket onto the soft top assembly bracket, aligning the hole at A1 with the pin at A2, The hole at B1 corresponds to the pin at B2

第二步: 把装车支架锁付治具(左边LH)和软顶总成支架一起放到左侧车身上, 把治具上带链子的销插入C孔进行定位。  
Step 2: Place the loading bracket locking fixture (left LH) and the soft top assembly bracket together on the left side of the vehicle body, and insert the pin with a chain on the fixture into the C-hole for positioning.

2-5

第三步

第三步：软顶总成支架螺栓锁付：在如图D1 D2位置处。

Step 3: Soft top assembly bracket bolt locking: at positions D1 and D2 as shown in the figure.

第四步：拔出定位销，卸载装车支架锁付治具（左边LH）。

图2 Figure2

上图E1处的V型槽和F1处销的安装间隙为  
**0mm**

第一步: 总成定位安装:  
以左边安装为例: 从软顶的左侧C处支架E1的V型槽对准软顶支架F1处的销进行快速定位贴合(图1) 为了保证0间隙的贴合, 可以从总成后端G处往上抬。  
确保C和D处的V型槽和销贴合后, 进行C1处螺栓锁死, 再进行右侧D1处螺栓锁死, 顺序按照C2-D2-C3-D3,再完全锁付。

Assembly positioning installation :T aking the installation on the left as an example: align the V-shaped groove of bracket E1 at position C on the left side of the soft top with the pin at position F1 of the soft top bracket for quick positioning and fitting (Figure 1). To ensure a zero gap fitting, it can be lifted upwards from position G at the rear end of the assembly. After ensuring that the V-grooves and pins at positions C and D are aligned, lock the bolt at position C1, then lock the bolt at position D1 on the right side in the order of C2-D2-C3-D3, and finally fully lock it.

**4** 注意：车顶展开时需要两名成年人同时操作，确保解锁同步。Roof installation requires two adults to operate at the same time

1. 折叠状态解锁（图3&图4）：根据图2箭头的位置往下按压左右两侧同时解锁；解锁完成后，左侧人员左手在位置C,右手在位置D（图4），右侧人员也是同样操作，2人同时往上抬升软顶，到达图3的位置，再左右同时往下按压使B处位置（两侧）处于锁紧状态。

Unlock in folded state (Figure 3 & Figure 4): Press down on both sides according to the position of the arrow in Figure 2 to unlock at the same time; after unlocking, the person on the left has his left hand in position C and his right hand in position D (Figure 4), and the person on the right does the same. Both people lift the soft top up at the same time to the position in Figure 3, and then press down on both sides at the same time to lock position B (Both sides).

2. 要进行软顶的全开，在B处进行解锁操作，对关闭进行反向操作即可。To fully open the soft top, perform the unlocking operation at B and the reverse operation for closing

- 5 1.锁止软顶：确定B处位置处于锁紧状态，在D处位置进行抬升旋转，完成软顶的关闭，在图3 箭头的位置进行左右两个锁止锁止。  
 Lock the soft top: Make sure that position B is in the locked state, lift and rotate at position D to close the soft top, and lock the left and right latches at the arrow positions in Figure 3.

注意：软顶未安装完成及锁止之前请勿驾驶车辆。 Do not drive the vehicle until the soft top is installed and locked.

2.在箭头锁止位置，由于车身系统误差的问题，可能会造成锁钩和车身钣金支架的方孔（红色圈）有偏差，此时可通过调节车身的连接钣金进行位置微调，以便锁钩和锁止孔完全匹配锁止，左右均可以同样操作，图4是左边位置。

At the arrow locking position, due to errors in the vehicle body system, there may be deviations between the locking hook and the square hole (red circle) of the body sheet metal bracket. At this time, the position can be fine tuned by adjusting the connecting sheet metal of the vehicle body, so that the locking hook and locking hole are completely matched and locked. The same operation can be performed on both sides. Figure 4 shows the left position.

3.使用T50梅花批头工具，对图4位置的两个锁付螺栓进行微调。  
 Use the T50 plum blossom screwdriver tool to fine tune the two locking bolts at the position shown in Figure 4.

6 安装后挡软玻璃总成 Install rear soft glass assembly:

1.打开后门，后软玻璃H处的圆形凸块，对准软顶总成的J处圆形孔，从左到右进行拉伸安装到位。  
Open the rear door, align the circular protrusion at H on the rear soft glass with the circular hole at J on the soft top assembly, and stretch and install it in place from left to right.

2.在如图1的G处，翻折软顶折角处，变成如图2；图3处的圈内凸块，对准图2处的方孔进行安装。  
At point G in Figure 1, fold the soft top corner to become as shown in Figure 2; Align the convex block inside the circle in Figure 3 with the square hole in Figure 2 for installation

3.图5处的卡扣对准图4处的卡槽销上进行安装，左侧的安装根据右侧的安装方式一样。  
Align the buckle at position 4 with the slot pin at position 3 for installation, and follow the same installation method on the left side as on the right side.

3.从左到右扣紧C处的四个卡扣，贴好魔术贴。  
Tighten the four buckles at point C from left to right and attach the Velcro.

安装两侧和后挡软玻璃总成 Install the side and rear soft glass assembly:

8 安装车身右侧软玻璃为例子: Taking the installation of the soft glass on the right side of the vehicle as an example

- 1.在如图1的L处, 对准图2的圆形孔, 进行拉伸安装。  
Align the circular hole in Figure 2 at L in Figure 1 and perform stretching installation.
- 2.拉伸安装到位后, 图1的P处塑料板扣入Q处的车身卡板卡槽里。  
After stretching and installing in place, the plastic plate at point P in Figure 1 is fastened into the body card slot at point Q.
- 3.图1的U处塑料板扣入图4后软玻璃的右侧开槽  
The plastic plate at U in Figure 1 is fastened into the groove on the right side of the soft glass after Figure 4
- 4.从左到右扣紧上端的三个卡扣, 贴好魔术贴, 完成软玻璃安装。  
Tighten the three buckles at the top from left to right, attach the Velcro, and complete the installation of the soft glass.

安装车身右侧软玻璃为例子： Taking the installation of the soft glass on the right side of the vehicle as an example

注意事项 Note:

1.右侧软玻璃安装完成后，将T处的橡胶条塞入拉线⑩内侧，完成安装。

After the installation of the soft glass on the right side is completed, insert the rubber strip at T into the inner side of the cable ⑩ to complete the installation.

在如图Y1 Y2的位置的尾门窗内部位置，确认锁扣锁止到位： Confirm that the locking buckle is in place inside the tailgate window at positions Y1 and Y2 as shown in the figure.

注意事项 Notes:

1.如上图位置，如果锁扣2，和锁杆1(上图黄色位置)的重合无法锁止，可以通过调整红色圈的螺帽（8号套筒），进行锁扣总成进行左右调节，直到可以锁止为止，再进行螺帽锁付进行锁紧。

As shown in the figure, if the overlap between lock buckle 2 and lock rod 1 (yellow position in the figure) cannot be locked, the lock buckle assembly can be adjusted left and right by adjusting the nut (No. 8 socket) circled in red until it can be locked, and then the nut can be locked for further tightening.
